

# Katana® Turf Herbicide

## PROTECTS FALL FAIRWAYS

You want to head into winter with your turf as weed-free as you can get it- **Katana® Turf Herbicide** has you covered. Labeled for fairways, roughs, and greens, Katana applied with your pre-emergent controls *Poa annua*, tall fescue, clumpy ryegrass, and more than 50 broadleaf and grassy weeds in non-overseeded warm-season turf species.

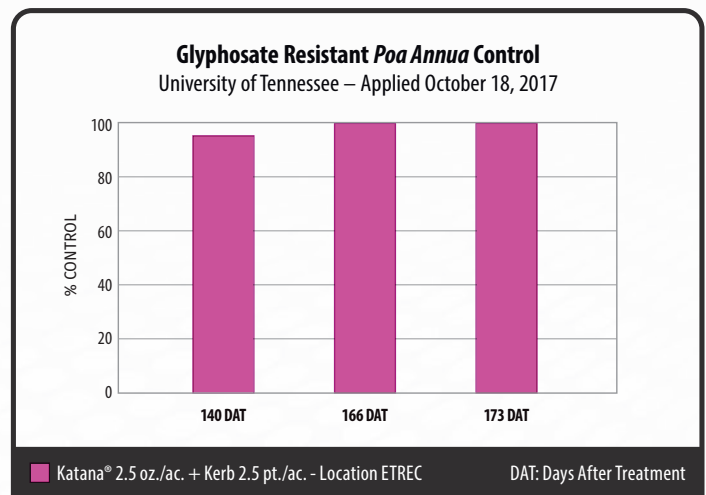

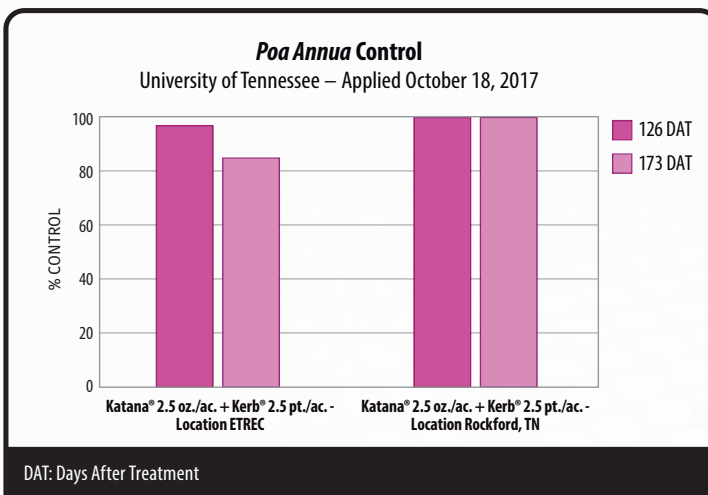

### Winter Grassy Weeds Controlled Winter Broadleaf Weeds Controlled

- |   |                     |                |
|---|---------------------|----------------|
| • <i>Poa annua</i>                          | • Henbit            | • Cudweed      |
| • Ryegrass (annual and perennial varieties) | • Chickweed         | • White clover |
| • Fescue                                    | • Carolina geranium | • Wild violet  |
|   | • Lawn burweed      | • Dandelion    |

**Rate:** 2.5 oz./acre for control of *Poa annua* (annual bluegrass). Use of a non-ionic surfactant is recommended with every application.
